

Food Sources of Calcium

Information About Calcium

- Calcium is a mineral that helps you build and maintain strong bones and teeth.
- Good calcium intake throughout your life can help to prevent osteoporosis. When you have osteoporosis your bones are weak and thin from a loss of calcium. Weak bones can break more easily than strong bones.
- Calcium is also used in other parts of your body. It helps your muscles work and your heart beat.

How Much Calcium Should I Aim For?

<i>Age in years</i>	<i>Aim for an intake of * milligrams (mg)/day</i>	<i>Stay below* mg/day</i>
Men and Women 19-50	1000	2500
Women 51-70	1200	2000
Men 51-70	1000	2000
Men and Women 71 and older	1200	2000
Pregnant and Breastfeeding Women 19 and older	1000	2500

*This includes sources of calcium from food and supplements.

Calcium Content of Some Common Foods

Milk and milk alternatives are excellent sources of calcium. If you do not include milk or milk alternatives in your diet, there are other foods which contain calcium as well. This table will show you which foods are a source of calcium.

<i>Food</i>	<i>Serving Size</i>	<i>Calcium (mg)</i>
<i>Vegetables and Fruit</i>		
<i>Vegetables</i>		
Collards, frozen, cooked	125 mL (½ cup)	189
Spinach, frozen, cooked	125 mL (½ cup)	154
Collards, cooked	125 mL (½ cup)	141
Turnip greens, frozen, cooked	125 mL (½ cup)	132
Spinach, cooked	125 mL (½ cup)	129
Turnip greens, cooked	125 mL (½ cup)	104
Kale, frozen, cooked	125 mL (½ cup)	95
<i>Fruit</i>		
Orange juice, fortified with calcium	125 mL (½ cup)	185
<i>Grain Products</i>	This food group contains very little of this nutrient.	
<i>Milk and Alternatives</i>		
<i>Milk and Milk Alternatives</i>		
Buttermilk	250 mL (1 cup)	370
Goat's milk, fortified	250 mL (1 cup)	345
3.3% homo, 2%, 1%, skim, chocolate milk	250 mL (1 cup)	291-324
Soy or rice beverage, fortified with calcium	250 mL (1 cup)	319
